TESTIMONIALS

Otolaryngologist

"I'm surprised every ENT practice in the country doesn't have one. It could make sense for general practitioners and other practices. I think it could be used in a more widespread manner. We use them all the time, every day. Half the people who come to our office need to have their ears cleaned." Buffalo, NY

"I love my Earigator. I even cleaned my own very difficult impacted cerumen ears!" Milwaukee, WI

"I do some free clinics. Earigator is so much faster, effective and safer than anything else out there. I can't believe someone didn't come up with this sooner." San Diego, CA

General Practitioners and Pediatricians

"For the first time after removing ear wax with the Earigator, we don't get calls the next day from parents upset that their child's ears are hurting them." Niagara Falls, NY

"We always tried to clean ears, but never felt comfortable with our technique. When we referred on to others, patients complained about the extra time and cost. With the Earigator, even the staff have no problem cleaning ears." Ft. Lauderdale, FL

Urgent Care/Minute Clinics/Walk-in Centers

"We advertise ear cleaning, but some locations dissuaded patients who asked about ear cleaning. Not anymore with the Earigator." Tucson, AZ

"We never felt like we did a good job cleaning ears. The instruments were difficult to use, and uncomfortable for the patients. Sometimes it took 20 minutes or more. With the Earigator we completely clean the ears, many times in seconds." Miami, FL

Emergency Room

"Believe it or not, we get a fair amount of ear wax issues in the emergency room. Allot of the staff are not that familiar (or even capable) of extracting ear wax. We trained all of our staff in 15 minutes. Cleaning ears is now a non-issue." Austin, TX

TESTIMONIALS

Audiologist

I have an Earigator already and LOVE it. It paid for itself in months. It is so easy to use even my most timid audiologist is comfortable providing this service to our patients. Grand Rapids, MI

"If you ever have a customer on the fence, I am happy to serve as a testimonial. The unit paid for itself within a few months and my patients have been very satisfied. Love the product." Des Moines, IA

"Been using the Earigator and am delighted. Thanks for coming to my office." Denver, CO

"As a retail outlet, we're always looking for ways to 'touch' our customer. Earigator is a fantastic tool to schedule our customer to periodically come back in for ear cleanings and show them other items they might need, or even new hearing aid technology." Concord, NH

Hearing Aid Centers

"We trialed a unit. It is the best ear wax removal instrument we have. Faster and safer than any other method. Even clinicians hesitant to clean deeply impacted ear wax can use the Earigator. We're going to outfit all 72 of our locations." Dallas, TX

"We use to refer out customers with impacted ear wax. Many times, they never come back, or they come back and their ears are still not clean. They complain about the extra time and cost. We can now clean their ears, test and fit them with hearing aids the same day. The Earigator paid for itself with one customer." Columbus, OH

Nursing Home

"We were having chronic ear wax issues. We were sending 10 patients out at a time to get their ears cleaned. It was such a hassle to coordinate. Now with the Earigator, we provide a great service to our patients (and their families), all in the comfort of their own room. It's saved us immense time and cost." Detroit, MI
